

Rayeesa Mahmood

Full-stack developer and UI/UX designer, building AI agent systems

Hyderabad, India rayeesamahmood8098@gmail.com linkedin.com/in/rayeesa-mahmood
github.com/RayeesaMahmood rayeesamahmood.github.io/PORTFOLIO

Profile

Computer Science & Engineering graduate who works across the whole arc of a product: the research question, the system design, the interface, and the deploy. My recent work applies multi-agent AI to administrative problems in healthcare and insurance, and has produced three published research papers and a Best Presenter award at ICSDE 2026.

Alongside building, I have spent four years in community work: leading technical training for 100+ students, co-organising state-level hackathons, and co-founding Bizzapt Enterprises, a digital studio for startups and small businesses.

Education

B.E., Computer Science & Engineering Graduated 2026
Lords Institute of Engineering and Technology, Hyderabad · CGPA 8.66 / 10

Intermediate (MPC) 2020 – 2022
Iqbalia Junior College · 8.8 / 10

Java became my first deep dive into programming.

Secondary school
Nalanda Public School

Research publications

- 1. AI-Agent Framework for Clinical and Health Insurance Workflow Optimization.** Published 2026. Presented at ICSDE 2026, where it received the Best Presenter award.
[DOI 10.6084/m9.figshare.32041392](https://doi.org/10.6084/m9.figshare.32041392)
- 2. RayCare: Hospital Queue Management System.** ORCHIDS International Conference.
[DOI 10.6084/m9.figshare.30545999](https://doi.org/10.6084/m9.figshare.30545999)
- 3. Multi-Agent Framework for Real-Time AQI Monitoring.** International Conference on Emerging Technologies.
[DOI 10.6084/m9.figshare.30933533](https://doi.org/10.6084/m9.figshare.30933533)

Projects

MediCore AI – clinical & insurance workflow automation

- Architected a five-stage multi-agent pipeline: symptom analysis, diagnosis, procedure, claim decision and fraud detection
- Designed modular agents for claims validation, appointment scheduling and patient-record synchronisation
- Evaluated on a 1,200-patient dataset; flagged suspicious claims with an interface staff can act on

[Python](#) · [REST APIs](#) · [Multi-agent architecture](#) · [medicore-psi.vercel.app](#) · [github.com/RayeesaMahmood/MediCore](#)

RayCare — hospital queue management & patient tracking

- Built registration, appointment booking, live queue position and notifications, with an admin dashboard
- Engineered the Firebase backend for concurrent users with sub-second sync; added emergency booking

[JavaScript](#) · [Firebase](#) · [HTML/CSS](#) · [Vercel](#) · [raycare.vercel.app](#) · [github.com/RayeesaMahmood/RayCare](#)

AuraOS — vision & voice-enabled system control

- An operating layer for hands-free control through voice commands and hand gestures
- Reached 96% accuracy on custom gesture recognition; combined voice, vision and intent into one command pipeline

[Python](#) · [OpenCV](#) · [MediaPipe](#) · [Speech recognition](#) · [React](#) · [ai-operating-layer-interface.vercel.app](#) · [github.com/RayeesaMahmood/kanz-Hackathon](#)

Multi-agent AQI monitoring

- Autonomous agents fuse sensor, satellite and public data into personalised air-quality guidance

[Multi-agent systems](#) · [Data fusion](#) · [Environmental AI](#) · DOI [10.6084/m9.figshare.30933533](#)

Bizzapt Enterprises — brand & website

- Designed the brand identity and built the responsive company site from wireframes to launch in two weeks

[Figma](#) · [HTML](#) · [CSS](#) · [JavaScript](#) · [rayeesamahmood.github.io/Bizzapt-Enterprises](#) · [github.com/RayeesaMahmood/Bizzapt-Enterprises](#)

Experience

Co-Founder

Current

Bizzapt Enterprises, Hyderabad

- Lead design and web development for a studio building digital presence for startups and growing businesses
- Steering the company towards AI automation products

Technical Head

Feb 2023 – Jul 2025

CodeWave Hub Community, Lords Institute of Engineering and Technology

- Designed and led Python fundamentals and Learnathon sessions for 100+ students across three batches
- Wrote structured lab guides that reduced onboarding time by about 30%
- Co-organised two Telangana state-level HackPrix hackathons with 50+ teams, coordinating technical infrastructure
- Mentored junior developers on full-stack development, REST API design and deployment

Web Development & Python Intern

6 months

IntenCode, Hyderabad

- Developed client-facing responsive pages in HTML5, CSS3 and JavaScript with cross-browser support
- Built Python automation for data processing and reporting, reducing manual time by about 40%

	Worked in a five-person Agile team with sprint deliverables and peer code reviews	
	Full-Stack Web Development Intern <i>PANTECH, Lords Institute of Engineering and Technology</i>	6 months
	- Developed and deployed two full-stack web applications with Python, Firebase and JavaScript - Hands-on with CI/CD pipelines, Vercel deployment and DevOps practice	
Awards & honours	Best Presenter , ICSDE 2026, Lords Institute of Engineering & Technology, for “AI-Agent–Integrated Framework for Optimizing Administrative Workflows”	Aug 2026
	Guinness World Record , AI Training Hackathon	Jul 2026
Certifications	Anthropic Claude course , LLM capabilities, API integration and application development	
	IBM SkillsBuild , ICT	
	Deloitte Australia , Technology job simulation	Jul 2025
	AWS APAC , Solutions Architecture job simulation	Jun 2025
	Tata Group , Cybersecurity Analyst job simulation	Jan 2025
Leadership & community	Vice President , Lords E-Cell	2024
	Documentation Head , Lords E-Cell	Sep 2023 – Dec 2024
	Treasurer , IEEE Student Branch, Lords: budgets for technical workshops and speaker sessions	2023 – 2025
	Organiser and mentor , HackPrix at Lords, reaching around 1,500 students	
	Judge and mentor , App Fusion	
	Member , Orators Club and Mobile Development Club	
Technical skills	Languages	Python, JavaScript, SQL, Java (intermediate)
	AI & LLMs	Claude API integration, prompt engineering, LLM-based workflows, agentic and multi-agent systems, OpenCV, MediaPipe, speech recognition
	Frontend	React, HTML5, CSS3, responsive design, Three.js
	Backend	Flask, Node.js, REST APIs, Firebase, SQL, NoSQL
	Design	Figma, Adobe XD, Photoshop, Illustrator, user research, wireframing, prototyping
	DevOps	Git, GitHub, CI/CD, Vercel, Netlify
References	Available on request.
